

EFT™ 2020

THE MOST POWERFUL MANAGED FILE TRANSFER ON THE MARKET JUST GOT BETTER

KEY RESULTS

Seamlessly facilitate global compliance readiness with the most stringent data security and compliance requirements including GDPR, PIPEDA, CCPA, NIST, PCI DSS, HiTECH, FIPS 140-2, HIPAA, ISO 9001, ISO 27001, ISO 27017, ISO 27018, SOC 1, SOC 2, SOC 3, SOX, EU-US Privacy Shield, and others

Create powerful workflows with improved automation flexibility with new event rule actions; create or set variables, run PowerShell scripts, and run subroutines within rules

Increase speed optimization of EFT reporting with rebuilt ARM tables to improve performance of report generation

Enhance person-to-person and person-to-system collaboration with the redesigned and modernized Web Transfer Client built on a leading edge platform

Centralize account management for end users, including privacy settings and ability to “opt out” of using personal data

Reduce overhead with a simplified architecture for a light-weight deployment that scales

EFT™ 2020: THE BEST IS HERE

Globalscape’s Enhanced File Transfer (EFT™) 2020 is the eighth generation of the award-winning managed file transfer platform. EFT™ 2020 simplifies the challenge of ever-evolving compliance requirements, eases the cloud migration process, and supplies much needed controls for GDPR, PIPEDA, and CCPA regulations. With EFT™ 2020, global enterprises achieve unmatched levels of simplicity and efficiency while addressing fast-growing data-centric regulatory demands.

Superbly positioned to support data migrations to the cloud through its hybrid and 100% cloud-based options, EFT™ 2020 improves product performance, streamlines FTP network architecture, enhances user experience, and offers a smoother integration with existing platforms.

GLOBAL COMPLIANCE HAS NEVER BEEN EASIER

Unmatched by Globalscape’s competitors, EFT™ 2020 supports a comprehensive set of data privacy related requirements. Globalscape is first to deliver a managed file transfer solution with a GDPR compliance package that supports your corporate compliance initiatives. It is equipped with a full set of advanced compliance-related features, including user rights exercise controls, fine-grained compliance controls, and a built-in GDPR Data Protection Impact Assessment (DPIA) report—all new industry offerings.

The first step towards GDPR compliance requires knowing where personal data is stored and transferred. EFT™ 2020 simplifies the GDPR by providing visibility for scoping compliance and directions for adjusting your EFT configuration. Each GDPR article (applicable to managed file transfer) is mapped to a configuration setting that controls EFT’s behaviour in an easy-to-manage dialog box with drop-down menu options that an EFT admin would specify.

One could consider the GDPR to be the “super-set” of most data privacy and security regulations that are out there. EFT™ 2020 can help businesses’ achieve compliance readiness with a slew of regulations like PIPEDA, CCPA, HIPAA, PCI DSS, HiTECH, NIST, and others. Today’s privacy regulations are forcing organizations to examine and address their privacy risk posture. EFT™ 2020 was built with privacy by design.

ABOUT GLOBALSCOPE

Globalscape, Inc. (NYSE MKT: GSB) is a pioneer in securing and automating the movement and integration of data seamlessly in, around and outside your business, between applications, people and places, in and out of the cloud. Whether you are a line-of-business stakeholder struggling to connect multiple cloud applications or an IT professional tasked with integrating partner data into home-grown or legacy systems, Globalscape provides cloud services that automate your work, secure your data and integrate your applications—while giving visibility to those who need it. Globalscape makes business flow brilliantly.

AUTOMATION FOR EVERYONE

EFT™ 2020 includes some of EFT's most popular advanced automation workflows available to everyone with EFT-native Event Rules, including a new PowerShell event rule action. PowerShell is a well-understood and flexible programmatic framework built into the Windows operating system. This added feature can handle extremely complex logic into the context of EFT's rule builder. In addition to PowerShell, there is now the ability to create and reuse “subroutines” between many rules, resulting in easier maintenance of workflows.

THE COMPLETE OVERHAUL OF THE WTC: IMPROVED P2P & P2S FUNCTIONALITY

Globalscape's development team did a ground-up rewrite redesigning the Web Transfer Client (WTC) inspired by design best practices. The WTC provides a rich and powerful user experience, including a full set of user profile controls in a centralized account management dashboard. Users can change their password, update their preferences, and set their data privacy guidelines within the WTC.

This centralization means users will spend less time searching for what they want and more time enjoying the efficiency and simplicity the WTC will bring to their work. In addition, the WTC can now solve the needs for specific data retention policies, such as keeping files for a certain period of time past the pick-up link expiration.

POWERFUL AUDITING & REPORTING

EFT™ 2020 presents the most powerful auditing and reporting available to EFT admins. The product underwent serious speed optimizations by updating report logic and layout, revamping database architecture, updating purge and helper scripts, overrides to irrelevant transfers and the addition of super-fast FACT tables. New reports are now available:

- Session logouts
- Privacy reports
 - ▶ User rights exercised
 - ▶ Terms and EU status changes
 - ▶ Admin changes to PD
- Negotiated SSH/SSL ciphers
- Multiple Workspaces Reports
- Detailed Admin changes

SUMMARY

EFT™ 2020 is a high-performance MFT for the modern enterprise. It is more than just a product for clients—it is a business solution designed to meet strict compliance requirements, high-volume workloads and “multiple-avenue” migrations. Globalscape simplifies managed file transfers and provides unmatched performance that reduces costs and makes life easier for the administrators, personnel, customers, partners - to anyone your organization shares files with.
