

ENHANCED FILE TRANSFER™ (EFT™) EXPRESS

KEY RESULTS

-  **Subscription or Perpetual Licensing** available to meet the business needs and requirements of any client
-  **Get an SFTP server** up and running in hours instead of days
-  **On premises, in the cloud, and hybrid** options available
-  **Easy** administration and end-user interfaces
-  **Active Directory**, ODBC, NTLM, or built-in user authentication
-  **End-user** access via browser
-  **Flexible, modular platform** allows you to choose only the features you need, when you need them
-  **Run scripts** and send emails based on event triggers

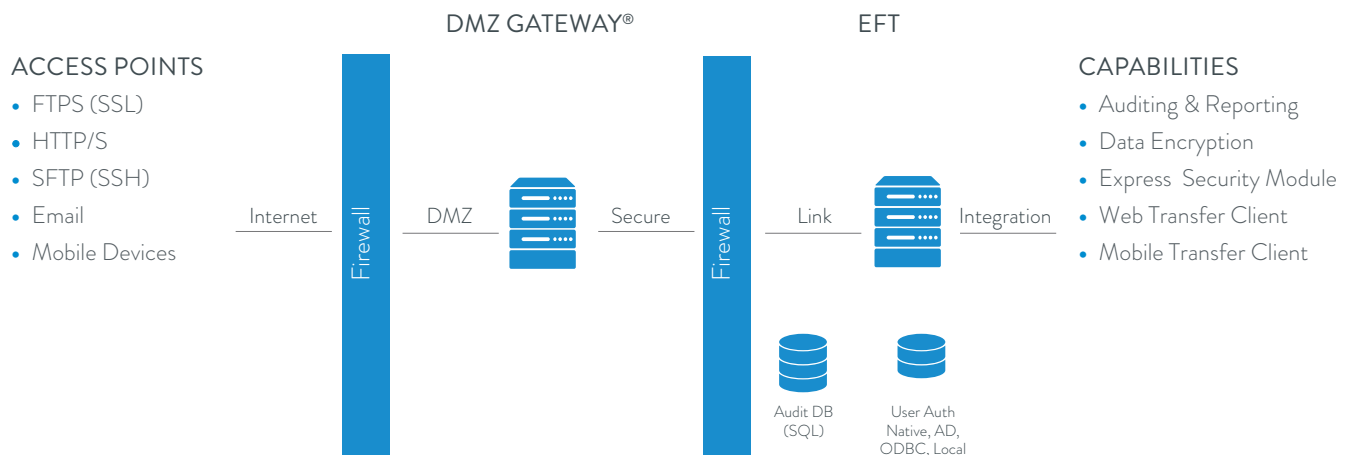

SCALABLE, AFFORDABLE SECURITY, CUSTOMIZED FOR YOUR BUSINESS

Globalscape's Enhanced File Transfer™ (EFT™) Express, designed for small-to-medium businesses, enables your organization to securely manage file transfers among worldwide offices, clients, and partners, ensuring that data confidentiality and integrity are preserved during transport and storage. EFT handles routine file transfer tasks, so you can turn your attention to tomorrow's business needs today.

The EFT Express modular platform makes it affordable by allowing you to purchase just the functionality you need. You can add advanced features as your business grows or your needs change. EFT Express has capabilities perfect for small businesses that need secure file transfer software, without advanced automation features.

Additional modules provide SFTP and HTTPS transfers, web-based transfer client, mobile transfer client, and automation events such as folder monitor, scheduled transfers, and copy/move/download actions.

EFT Express can automate the delivery of data when it's needed, instead of when you have time to do it, increasing your day-to-day productivity and overall operational efficiency. The automation features in EFT Express provide more control than SFTP servers, and a more efficient and secure data exchange process than FTP. You can reduce file transfer setup time by up to 80 percent over manual transfer processes.

LET EFT EXPRESS AUTOMATE YOUR DATA PROCESSES

Additional, optional modules provide even more automation and security capabilities:

- The **Folder Monitor** module creates an Event Rule trigger used to detect the creation, deletion, and renaming of files in a monitored folder and to perform Actions based on these triggers. For example, you can define an Event Rule so that when EFT Express detects that a file has been added to the folder, an email is sent to notify one or more users that the file is available
- The **Timer module** allows you to execute a specified Action (e.g., generate and send a report) only one time or repeatedly at specified intervals
- The **File Transfer Client module** enables EFT Express admins to define copy, move, and download actions in Event Rules
- The **OpenPGP module** performs file encrypt/decrypt/sign/verify operations as files are uploaded or downloaded
- The **Auditing and Reporting module** enables automated report generation of EFT activities
- The **SFTP module** enables file transfers over SFTP
- The **HTTP/S module** enables file transfers over HTTP and HTTPS

SYSTEM REQUIREMENTS

- › Windows Server 2016 or 2019
- › 4GB available RAM, minimum
- › Microsoft SQL database
- › MS .NET frameworks 4 or later
